Kitted Solutions

(Lighting Panels)

The supply chain issues that have plagued nearly every industry over the past three years continue to impact the availability of switchgear components. Current manufacturer lead times on many components are anywhere from weeks to years long.

To help ease the burden and offer you the products you need to keep your projects on schedule, we have developed a select option of stocked panelboard kits.

OUR IN-STOCK PANELBOARD KITS INCLUDE:

- 225A or 400A Interior
- Main Breaker or Main Lugs
- Ground Bars & Ground Lugs
- Panel Can & Cover

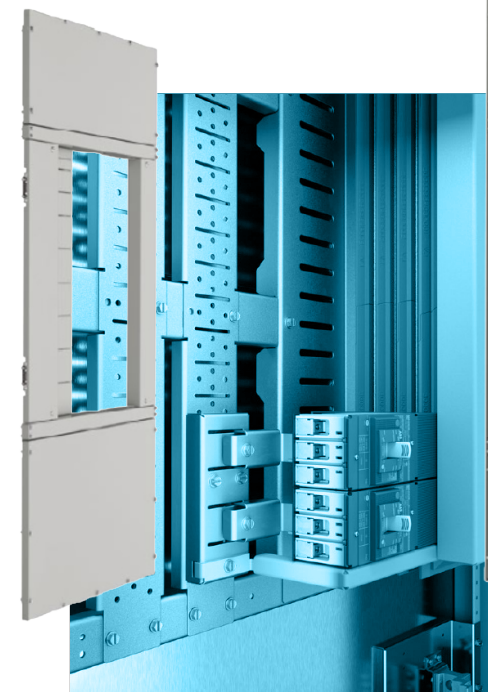

NOTE: Branch Breakers must be ordered separately.

Configurable Solutions

(Power Panels)

Introducing neXT SuperBox
Power Panelboards
600, 800 & 1200 Amp
NEMA 1 or NEMA 3R

Need a power panelboard in a hurry?

ABB's ReliaGear merchandised neXT SuperBox power panelboards are ready to go. The panelboards, are available in local inventory, use plug-in Tmax XT circuit breakers for easy installation and location flexibility and are field modifiable for top or bottom feed changes. They're perfect for emergencies, electric vehicle charging installations, data centers, industrial applications, commercial renovations, building expansions and other quick-turn jobs.

The SuperBox offer is a combination of enclosures, interiors, ground, neutral, fronts and fillers available from inventory for immediate installation. In stock at Agilix Solutions. One SKU includes everything needed for the power panelboard selection.

Ask your Agilix Solutions Account Manager or Inside Sales Representative for more information.
